Date

5th – 9th October 2026

Venue

Pridelnn Paradise Beach Resort
& Spa | Mombasa, Kenya

Conference Introduction

The next cyber crisis will not ask who owns the firewall. It will ask who is ready to lead the organization.

When systems fail...
When ransomware cripples operations...
When Artificial Intelligence is weaponized against your organization...
When deepfake videos undermine public trust...
When regulators demand answers...
When customers lose confidence...
When the Board expects immediate decisions...
Technology does not take charge.
Leadership does.
The defining question of the next decade is no longer "Can your organization prevent every cyber attack?"

It is:
"Can your leadership lead beyond the breach?"

Across Africa and around the world, cyber incidents are escalating in speed, sophistication and impact. Artificial Intelligence has transformed both opportunity and risk. Digital transformation has expanded the attack surface. Geopolitical tensions, insider threats, supply chain compromises, ransomware, cloud vulnerabilities and misinformation campaigns have elevated cyber resilience from an IT responsibility to one of the most significant leadership priorities facing Boards and Executive Management today.

The organizations that will inspire trust, maintain continuity and emerge stronger will not simply be those with the latest cybersecurity technologies—they will be those whose leaders can make sound decisions under pressure, govern responsibly, communicate with clarity, and steer their institutions confidently through uncertainty.

That is why we invite you to participate in the **International Cyber Leadership & Resilience Conference 2026**—Africa's premier executive forum dedicated to strengthening leadership, governance, Artificial Intelligence, cyber resilience and organizational preparedness.

Executive overview: This executive conference equips Board members, senior executives, policymakers and resilience leaders to govern cyber risk, lead through AI-enabled disruption, and protect organizational trust when digital crises occur. Through masterclasses, boardroom simulations, crisis leadership exercises and strategic peer dialogue, delegates will leave with practical governance tools, decision-making frameworks and resilience playbooks ready for implementation.

This is not a cybersecurity conference.

It Is A Leadership Conference About Cybersecurity.

The cyber landscape has fundamentally changed. Cyber attacks are no longer isolated technical incidents managed quietly by ICT departments. Today, a single cyber event can simultaneously become:

- A Board governance crisis.
- A reputational emergency.
- A legal liability.
- A regulatory investigation.
- A financial disruption.
- A public relations challenge.
- A national security concern.
- A leadership test.

In today's interconnected world, leadership has become the most critical cybersecurity capability an organization possesses.

Technology may detect threats.

Artificial Intelligence may automate responses.

But only leaders can make strategic decisions when everything is at stake.

Why this conference matters now

Every week, organizations around the world lose millions through ransomware attacks, sophisticated phishing campaigns, insider threats, data breaches, Artificial Intelligence-enabled fraud and attacks on critical infrastructure.

Yet investigations repeatedly reveal the same underlying challenge.

The failure is rarely technology alone.

It is governance.

It is leadership.

It is decision-making.

It is crisis communication.

It is organizational preparedness.

It is resilience.

Despite unprecedented investments in cybersecurity technologies, many organizations remain vulnerable because executive leadership, Board oversight, governance structures and crisis response capabilities have not evolved at the same pace as technology.

This Conference addresses the leadership gap.

A defining moment for executive leaders

Digital transformation has redefined every organization.

Artificial Intelligence is transforming every industry.

Cyber resilience has become a Board agenda.

Public expectations continue to rise.

Regulators are demanding stronger accountability.

Investors increasingly evaluate governance maturity.

Customers expect transparency.

Employees expect leadership.

The question is no longer whether your organization will experience disruption.

The question is whether your leadership team is prepared when disruption arrives.

What makes this conference different?

Unlike traditional cybersecurity conferences that focus primarily on technology, tools and vendors, the International Cyber Leadership & Resilience Conference is built around one central principle:

Cyber resilience is ultimately a leadership capability.

This executive forum has been carefully designed for senior decision-makers responsible for governing organizations—not managing firewalls.

For five intensive days, participants will engage in immersive learning experiences that replicate the realities executives face during cyber crises.

Expect practical learning.

Expect executive dialogue.

Expect strategic thinking.

Expect difficult decisions.

Expect transformational leadership development.

The value proposition:

Why this conference is a strategic advantage

This conference helps senior leaders build the judgement, governance tools and crisis-response confidence they need before cyber risk becomes a Board, regulatory, operational and reputational emergency.

What your organization gains

- A practical cyber crisis playbook with clear roles, escalation paths, decision rights and communication priorities.
- Board-level confidence to oversee cyber and AI risk, challenge assumptions and make decisions under pressure.
- Tools for responding to ransomware, data breaches, deepfakes, AI-enabled fraud, supply-chain compromise and public scrutiny.
- Cross-functional alignment between ICT, Risk, Legal, Communications, Human Resources, Operations and the Board.

Why delaying is costly

The leaders who attend will return with practical tools and tested response habits while others are still debating whether cyber resilience belongs on the executive agenda. In a crisis, that gap affects speed, trust, accountability and continuity.

Seats are intentionally limited to preserve executive-level dialogue, confidential peer exchange and meaningful simulations. Once capacity is reached, late nominations will miss the opportunity to prepare alongside leading cyber, governance and resilience decision-makers.

An immersive executive experience

Participants will take part in:

Executive Leadership Masterclasses

Learn directly from international practitioners on executive cyber governance, resilience leadership and strategic decision-making.

Boardroom Cyber Simulations

Experience realistic crisis scenarios requiring executive judgement, leadership coordination and rapid decision-making under pressure.

Artificial Intelligence Leadership Forum

Explore how Boards and executives can govern Artificial Intelligence responsibly while unlocking innovation and managing emerging risks.

Executive Crisis Leadership Exercises

Practice leading organizations during cyber emergencies involving media pressure, regulatory scrutiny, stakeholder expectations and operational disruption.

Cyber Resilience Laboratories

Develop practical resilience strategies, governance frameworks and institutional response plans.

Strategic Executive Dialogues

Exchange insights with senior leaders confronting similar governance and resilience challenges across sectors.

Executive Case Studies

Learn from major cyber incidents affecting governments, financial institutions, multinational corporations and critical infrastructure worldwide.

You will leave ready to lead

- Upon completion, participants will be able to:
- Lead confidently during cyber crises.
- Strengthen Board oversight and executive accountability.
- Build enterprise-wide cyber resilience.
- Align ICT, Risk, Legal, Human Resources, Communications and Operations around a common resilience strategy.
- Govern Artificial Intelligence responsibly.
- Improve executive decision-making during uncertainty.
- Protect organizational reputation.
- Strengthen stakeholder trust.
- Enhance business continuity capabilities.
- Develop executive resilience playbooks ready for immediate implementation.

Who should attend?

This Conference is designed exclusively for senior leaders responsible for strategy, governance and organizational resilience, including:

- Board Chairpersons
- Board Directors
- Chief Executive Officers
- Principal Secretaries
- Permanent Secretaries
- Managing Directors
- Commissioners
- Chief Information Officers (CIOs)
- Chief Information Security Officers (CISOs)
- Chief Risk Officers
- ICT Directors
- Internal Audit Executives
- Human Resource Directors
- General Counsel
- Compliance Officers
- Communications Directors
- Business Continuity Managers
- Digital Transformation Leaders
- Critical Infrastructure Executives
- Regulators
- Development Partners
- Cybersecurity Leaders

Who you will meet

This Conference brings together executive leaders from:

- Government Ministries and Agencies
- Financial Services
- Central Banks
- Banking
- Insurance
- Telecommunications
- Healthcare
- Energy
- Manufacturing
- Transport
- Aviation
- Universities
- Development Partners
- Technology Companies
- Security Agencies
- Utilities
- Critical Infrastructure Organizations

This is more than a conference.
It is an executive network where Africa's future cyber leaders will connect, collaborate and shape resilience strategies together.

Conference

International Cyber Leadership & Resilience
Conference 2026

Theme

Leading Beyond the Breach

Dates

5th – 9th October 2026

Venue

Pridelnn Paradise Beach Resort & Spa,
Mombasa, Kenya

Duration

Five Executive Learning Days

Format

Executive Masterclasses • Boardroom
Simulations • AI Leadership Forum • Crisis
Labs • Practical Workshops

Executive investment

Conference Fees

KES
85,000
(Exclusive of VAT)

US\$
800.00
(Inclusive of VAT)

Registration Includes

- Five-day Executive Conference
- Executive Masterclasses
- Leadership Forums
- Boardroom Cyber Simulations
- AI Leadership Sessions
- Practical Workshops
- Delegate Resource Pack
- Conference Materials
- Certificate of Participation
- Executive Networking Events
- Daily Tea Breaks and Lunch

Accommodation, travel and personal expenses are excluded.

Why you should secure your place now

Cyber leadership is not built in the middle of a breach. It is built before the pressure starts, before the cameras arrive, before regulators ask questions and before the Board demands answers.

That is why this conference is designed for leaders who want to be ready before readiness becomes urgent.

Participation is intentionally limited to protect the quality of executive dialogue, confidential peer exchange, immersive simulations and direct engagement with facilitators.

When capacity is reached, late nominations will not be added to the programme.

The organizations represented in the room will leave with stronger judgement, tested response habits, practical playbooks and executive relationships that can matter when a crisis crosses sectors, borders and supply chains.

Those who wait may find themselves trying to build confidence, coordination and credibility after disruption has already begun.

THE SEAT YOU SECURE NOW MAY
BE THE DECISION THAT PROTECTS
TRUST LATER.
THE COST OF PREPARATION
IS MODEST. THE COST OF
UNPREPAREDNESS CAN BE
CATASTROPHIC.

When the next cyber crisis arrives, your Board will expect leadership.

Your employees will expect direction.

Your customers will expect reassurance.

Your regulators will expect accountability.

Your institution will expect resilience.

The only remaining question is:

Will your leadership team be ready?

Secure your place now—before the room is full and before the next crisis tests your institution.

Reserve your place today

Join senior executives, Board leaders, policymakers, regulators, cybersecurity experts, resilience practitioners and digital transformation leaders from across Africa for five exceptional days of executive learning, strategic dialogue and practical leadership development.

Be part of the leaders shaping Africa's cyber-resilient future.

Lead Beyond the Breach.

Lead with Confidence.

Lead with Resilience.
